

Expertise & Services

TechShack has the experience & proficiency and welcomes projects in the following:

- ◆ Software Development
- ◆ Website & Web Application Development
- ◆ Mobile/PDA Application Development
- ◆ Voice (Intercom PABX), Data Network Design & Maintenance
- ◆ PC & Electronic Troubleshooting
- ◆ Electronic System Design & Development
- ◆ ICT Consultancy Services

TechShack is looking for software and hardware related contract jobs that VanniTech graduates can do from North-East.

It would also outsource VanniTech's experienced graduates for working with other organizations.

Testimonials by TechShack Clients

"Network system and intercom they installed are functioning effectively, and it enabled us to perform our work easily. TechShack attends the requests immediately, even though it is late in evenings. Their jobs are up to the professional standards."

— Ms. P. Pathmalatha, Admin, UNDP, Kilinochchi

"I believe that the availability of such a database will surely help our organization to document all our activities more accurately. Although we have been functioning as a counseling organization for last nine years, the database software prepared by TechShack is the first of its kind to be used by our organization."

— Rev. Fr. Edmund Reginald OMI, Coordinator, Annai Illam - Association for Counseling and Psychological Education, Kilinochchi

"We are grateful for the endeavor by your pleasant development team who tirelessly worked to meet our requirement and completed within the specified time frame. Your Medical Inventory Tracking System has helped us in reducing our time and efforts in managing the donations, purchase and dispatch of medications and other items."

— Dr. Moorthy, Program Coordinator, Centre for Health Care, Kilinochchi

VanniTech's Employment Incubation Center

TechShack-VanniTech's Employment Incubation Center

TechShack, VanniTech's Employment Incubation Center, was setup as a high-tech solutions center for the purpose of training students and encouraging creation of employment. It utilizes VanniTech students and graduates to serve the technological advancement of North-East Sri Lanka.

TechShack has provided technical solutions and assistance to governmental, non-governmental organizations and other local business entities to enhance their efficiency, productivity and services.

It has also attracted international outsourcing projects through its expertise, quality of service and competitive pricing. In addition, it supports companies and individuals in setting up development centers in Sri Lanka.

Vanni Institute of Technology

Vanni Institute of Technology (also known as VanniTech), a registered non-profit educational establishment based in Kilinochchi, Sri Lanka.

The objective of VanniTech is to generate high-tech employment in North-East Sri Lanka, and prepare the people in the region to compete in the international market. To meet this objective, VanniTech offers one year full time academic programs in software development, electronics, and computer communications in English medium. Its academic programs have been carefully selected to include the latest and the most beneficial technology that is appropriate to the country.

VanniTech is founded and funded by ITTPO-International Tamil Technical Professionals' Organization, California, USA. Additional information about VanniTech can be found at www.vanni.org and www.ittpo.org.
